**Subject:** cleared letter to editor  
**Attachments:** Bottom up letter-NCEA cleared-6-27-14.docx

Kenny:

The attached letter has been cleared by NCEA management for publication. There were minor edits since the last version we sent you. There is one sentence that we are divided on. Some of us (co-authors) would like the following last sentence of the second para to end on the word approach (deleting the rest of the sentence). You can have the joy of resolving yet one more argument.

“We focus here on the latter issue, which we believe is a fundamental flaw in this approach as a means of producing an upper bound on dose-response at low exogenous doses.”

Hope your summer has been good so far!

Best Regards,  
Ravi.
